ABOUT ME

Frontend Engineer with 5+ years of experience in UI-heavy products: editors, dashboards, e-commerce, and Telegram Mini Apps.

Focused on complex interfaces, animations, architecture, design systems, and performance optimization.

EXPERIENCE

Cobalt Lab

Senior Frontend Engineer

6 m · Oct 2025 — Apr 2026

Cyprus, Remote

Real-money iGaming platform. Joined mid-rebuild — a UI redesign running in parallel with an architecture rework, on top of heavy accumulated legacy.

- **ARCHITECTURE & REFACTORING:** Key refactors — network layer centralization, splitting **2–3k-line god components and stores** (with legacy parity), codebase-wide TypeScript standardization, and security hardening across user flows.
- **PRODUCT & FEATURES:** As one of two frontend engineers, owned **18+ end-to-end product features** across **50+ epics** — retention events, onboarding, new banner system, referral program, reward claim.
- **PROCESS & TEAM:** Every feature shipped through a **full production cycle** — responsive on desktop/tablet/mobile, unit-tested, localized via admin panel, CDN-delivered with WebP + compression, event tracking via PostHog.

TypeScript · PostHog · Vitest · Tailwind

Freelance

Senior Frontend Engineer (React, TypeScript)

9 m · Jan 2025 — Oct 2025

Remote

Independent product work — web apps and Telegram Mini Apps across iGaming, e-commerce, and crypto.

- Built **UI-heavy** web applications and Telegram Mini Apps using React / Next.js.
- Implemented complex animations, interactive states, and responsive layouts.
- Developed e-commerce frontends (catalogs, carts, payment flows) with CI/CD.
- Optimized performance, UX, and initial load.

Orbit — Portal

Senior Frontend Engineer

6 m · Sep 2024 — Mar 2025

Dubai, Remote

Telegram gaming platform that grew to **1M users**.

- **PRODUCT & FEATURES:** Led the frontend of a Telegram gaming platform from pre-launch to **1M users**, owning UI and core business logic (rewards, purchases, ads)
- Delivered rich animated interactions and visual theming based on user-selected Telegram styles using Motion.js, custom particle systems, and Spline-based animations
- Designed and built platform-level components and reusable UI for partner Telegram Mini Apps, including shared services (authentication, profiles, balance & inventory sync, leaderboards)
- **PERFORMANCE:** Optimized for Telegram Mini Apps constraints: **reduced initial JS payload by 55%** (1.1 MB → 490 KB gz) via code-splitting, tree-shaking, and asset deduplication

Incymo — SmartUA

Senior Frontend Engineer

1 y 4 m · Jun 2023 — Sep 2024

Tbilisi, Remote

AI tooling for generating ad creatives.

- **PRODUCT & FEATURES:** Developed a complex image and video editor with multi-layer support, batch imports, timeline, and animation system
- Designed and implemented an ad banner generator with a flexible template system and post-generation editing
- Led a full UI redesign from a legacy Android-style interface to a modern **Material 3+** design system
- Built analytical dashboards with charts and visual summaries across multiple ad networks, **reducing campaign review time from ~10 to ~2 minutes**

TypeScript · Tailwind · Design Systems

Icons8 LLC — Icons

Frontend Engineer

1 y 9 m · Oct 2021 — Jun 2023

Innopolis, Remote

Icon and design-asset platform.

- **PRODUCT & FEATURES:** Built the Iconizer SVG editor on Paper.js with support for grouped downloads, editable previews, syntax-highlighted embed code, and role-based access
- Maintained and extended a shared internal UI kit used across multiple products, including accessibility improvements
- Improved in-product ad UX, **increasing CTR by 18%** and achieving **72% viewability**
- **PERFORMANCE:** Optimized performance using lazy loading, SSR, and image compression — **LCP -42%, CLS 0.03, image payload -55%**

Paper.js · SVG · Web Performance Optimization

MKSKOM LLC

Frontend Engineer

7 m · Feb 2021 — Aug 2021

Moscow, Remote

Document-heavy enterprise system.

- Developed isolated SPA modules integrated into a legacy monolithic system, including PHP-based integrations
- Built an internal UI kit for document-heavy workflows
- Implemented a complex editable table with nested forms and full mobile responsiveness
- Improved UX to reduce repetitive manual steps in bureaucratic interfaces

EDUCATION

Bachelor of Computer Science, Software Engineer

2017 — 2021

Innopolis University

- Advanced JavaScript coursework
- Product design and management fundamentals
- Data structures and algorithms
- Frontend and UI-focused academic projects

AWARDS

- **Winner**, Digital Breakthrough 2020 Hackathon (Northwest IT Hub), 280 teams
- **Winner**, OpenSpaceHack 2020

TEACHING

- Experience teaching programming (Android, Python, robotics)
